README.rst
Requests: HTTP for Humans
pypi v2.10.0
downloads 8k/month
Requests is the only Non-GMO HTTP library for Python, safe for human consumption.
Warning: Recreational use of other HTTP libraries may result in dangerous side-effects, including: security vulnerabilities, verbose code, reinventing the wheel, constantly reading documentation, depression, headaches, or even death.
Behold, the power of Requests:
>>> r = requests.get('https://api.github.com/user', auth=('user', 'pass'))
>>> r.status_code
200
>>> r.headers['content-type']
'application/json; charset=utf8'
>>> r.encoding
'utf-8'
>>> r.text
u'{"type":"User"...'
>>> r.json()
{u'disk_usage': 368627, u'private_gists': 484, ...}

on, safe for human consumption.
